KEY TAKEAWAYS

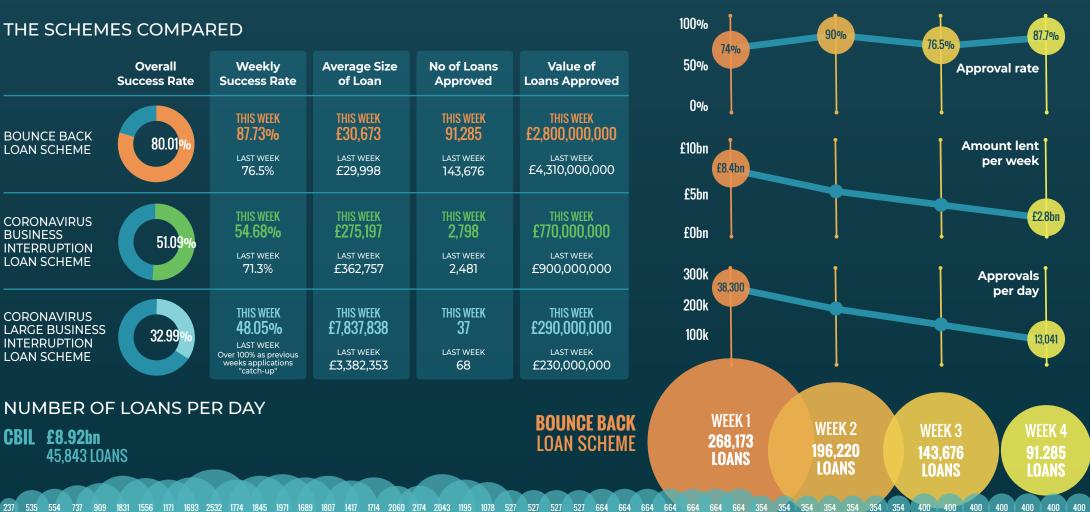

The average loan amount remains around the £30k assuming every borrower is applying for the max 25% of turnover, it shows the scheme really helps smaller SMEs.

Although volumes and loan amounts have fallen significantly again this week, the 80% approval rate and the £20bn+ of total lending via the scheme is a huge injection of capital into SMEs. The Large CBIL Scheme continues to underperform. The UK's "Mittelstand" is the real backbone of the economy and needs better support than this.
