

KEY TAKEAWAYS

Low application volumes over last few weeks suggest (in our view) unwarranted negative publicity may be "scaring off" legitimate borrowers.

Average size of £275k this week and £194k since the commencement of the Scheme ties in with what we are seeing - most borrowers keen to remain below the £250k limit where PGs kick in.

Overall approval rate remains at 50% - many borrowers are not suitable for debt, government needs to devise other solutions for this large cohort of companies.

LOAN APPROVAL SUCCESS
